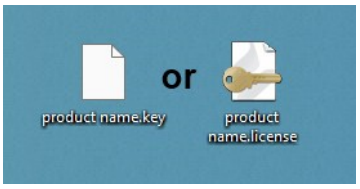
Product Activation

TBProAudio plugins are activated in two ways: either with an **activation key**:

"00012536EFD1003A006C31443355414534424238383839453835373143454133333032453731323634463543343237454434463945314433454531393641353 8F950932B82269A5E"

or with an **activation key file** (packed in a zip-file):



You will receive the activation key file or the activation key after purchase of the product **per email** from TBProAudio. This guide is also available as PDF download:

Plugin activation with activation key

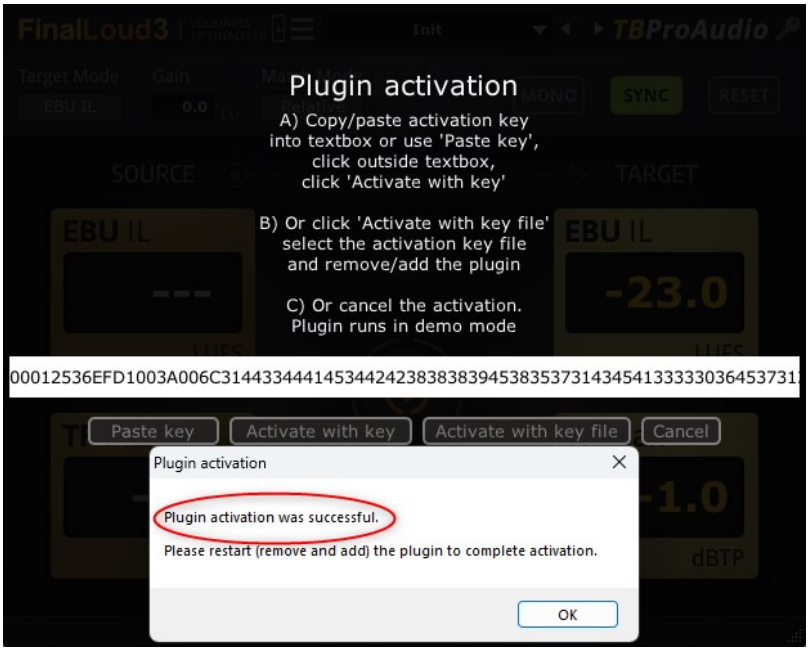
"00012536EFD1003A006C31443355414534424238383839453835373143454133333032453731323634463543343237454434463945314433454531393641353 8F950932B82269A5E"

1) Open your DAW, create an empty project with an empty track and insert the purchased plugin as effect (example FinalLoud3):

2) Open the GUI of the plugin. The activation screen will appear. If not, remove the plugin and add it again:

3) Copy the activation key (without quotes) from the email to OS clipboard (WIN ctrl c or MAC cmd c or right mouse click copy),
paste it into the text box with the button 'Paste key' (or click into text box and then WIN ctrl v or MAC cmd v or right mouse click paste and click out side of the textbox)
and click on the ' Activate with key' button:

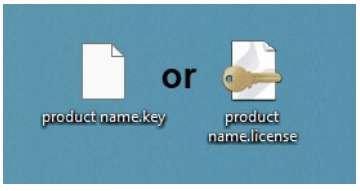
4) After successful activation following dialog box shows up:



5) Press OK, remove the plugin and add it again. The key icon lights up in golden color:

Plugin activation with activation key file

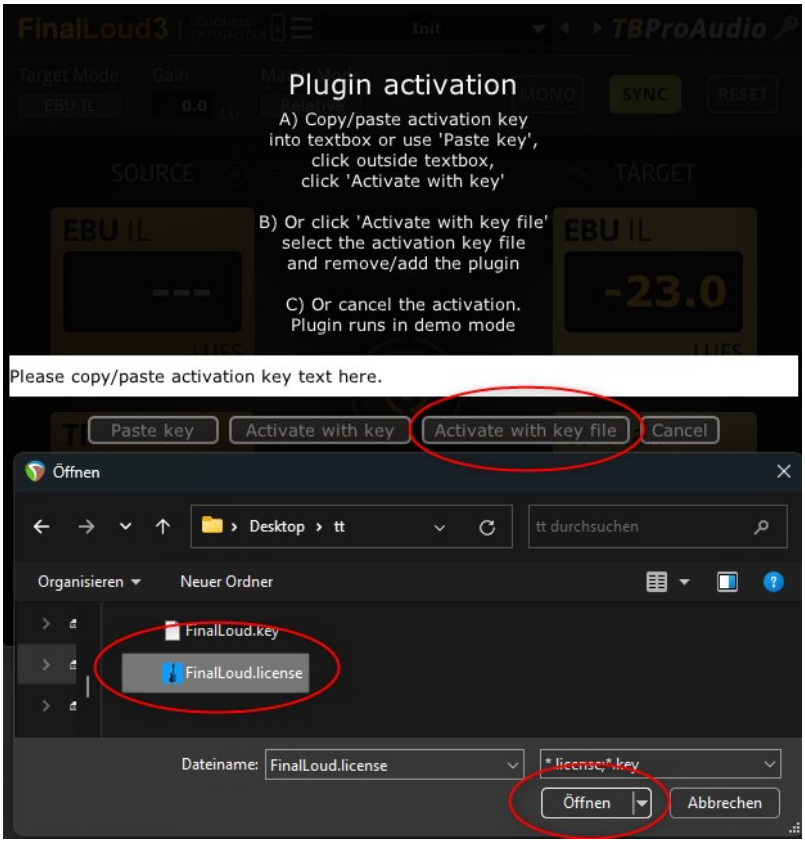
1) Place the activation key file from the email to a suitable place of your computer e.g. the desktop:



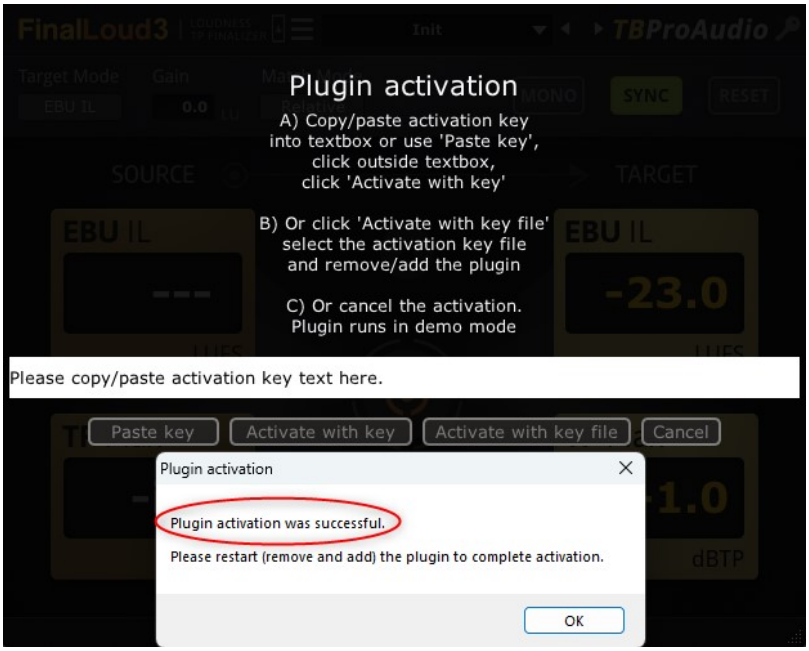
2) Open your DAW, create an empty project with an empty track and insert the purchased plugin as effect (example FinalLoud3):

3) Open the GUI of the plugin. The activation screen will appear. If not, remove the plugin and add it again:

4) Click on the button 'Activation key file', a file selector box shows up, navigate to the location where you placed the activation key file, select it an press 'Open':



5) After successful activation following dialog box shows up:



6) Press OK, remove the plugin and add it again. The key icon lights up in golden color:
