

TBProAudio Product Activation (03/2022)

TBProAudio plugins can be activated in two ways: either with an activation key:

"00012536EFD1003A006C314433554145344242383838394538353731434541333330324537313236344635433432374544344639453144334545313936413538F950932B82269A5E"

or with an activation key file (packed in a zip-file):

You will receive the activation key file or the activation key after purchase of the product per email from TBProAudio.

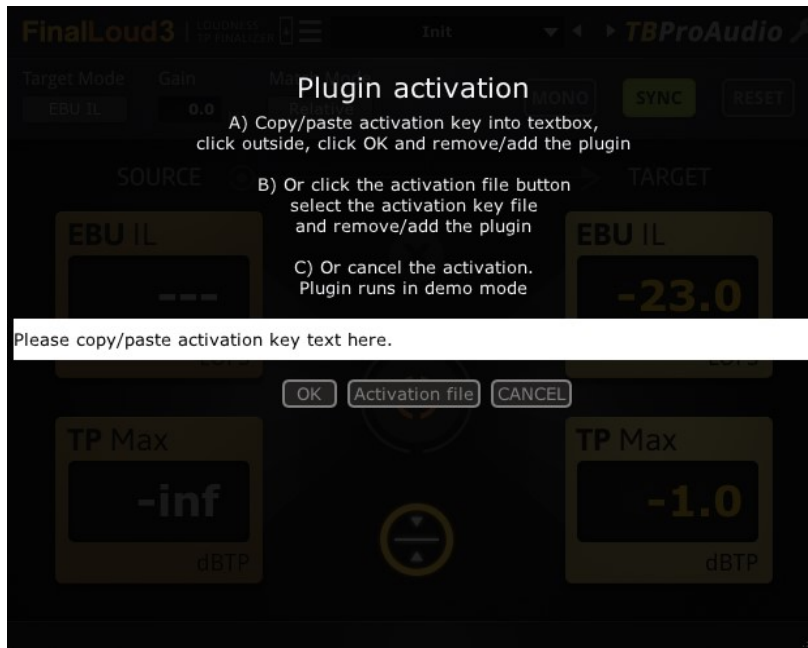

Plugin activation with activation key

"00012536EFD1003A006C314433554145344242383838394538353731434541333330324537313236344635433432374544344639453144334545313936413538F950932B82269A5E"

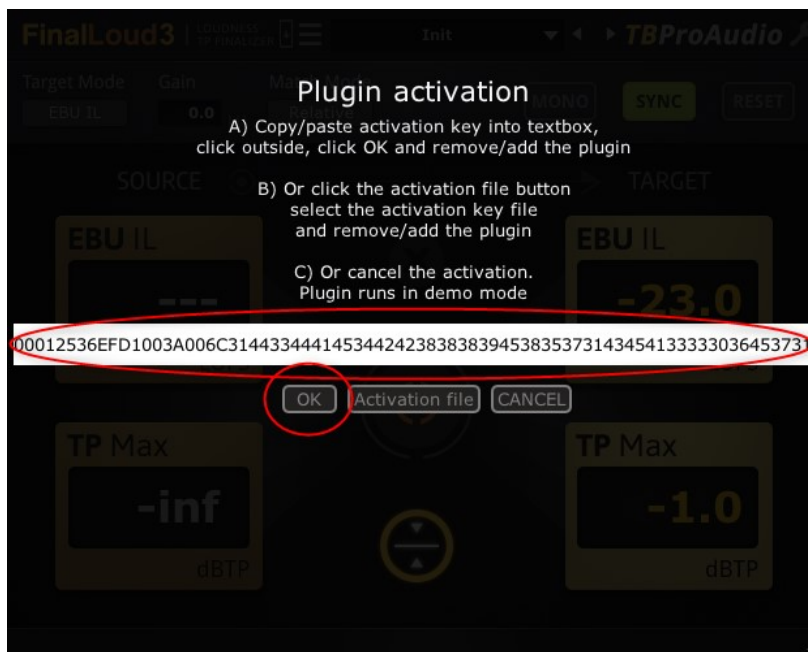

- 1) Open your DAW, create an empty project with an empty track and insert the purchased plugin as effect (example FinalLoud3):

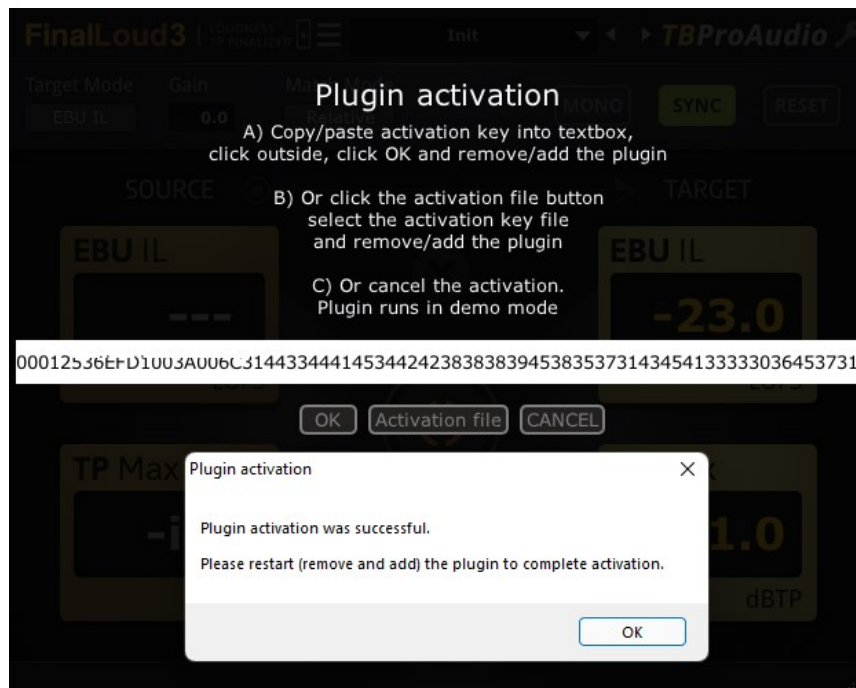

- 2) Open the GUI of the plugin. The activation screen will appear. If not, remove the plugin and add it again or go to the plugin menu->Activate plugin:

- 3) Copy the activation key (without quotes) from the email to OS clipboard (WIN ctrl c or MAC cmd c or right mouse click copy), paste it into the text box (WIN ctrl v or MAC cmd v or right mouse click paste), click outside of the textbox and click on the OK button:

4) After successful activation following dialog box shows up:

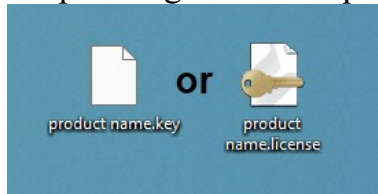

5) Press OK, remove the plugin and add it again. The key icon lights up in golden color.

Plugin activation with activation key file

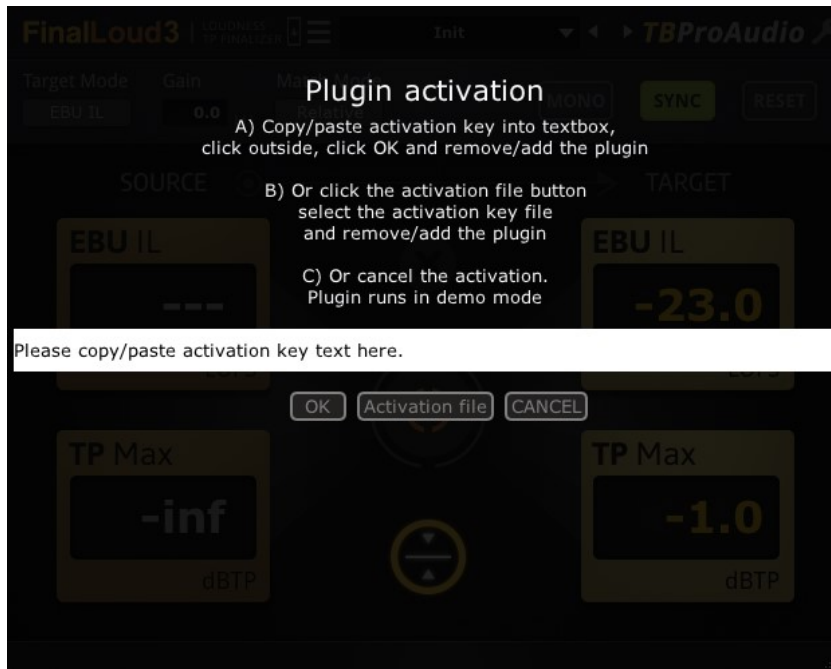

- 1) Place the activation key file from the email to a suitable place of your computer e.g. the desktop.

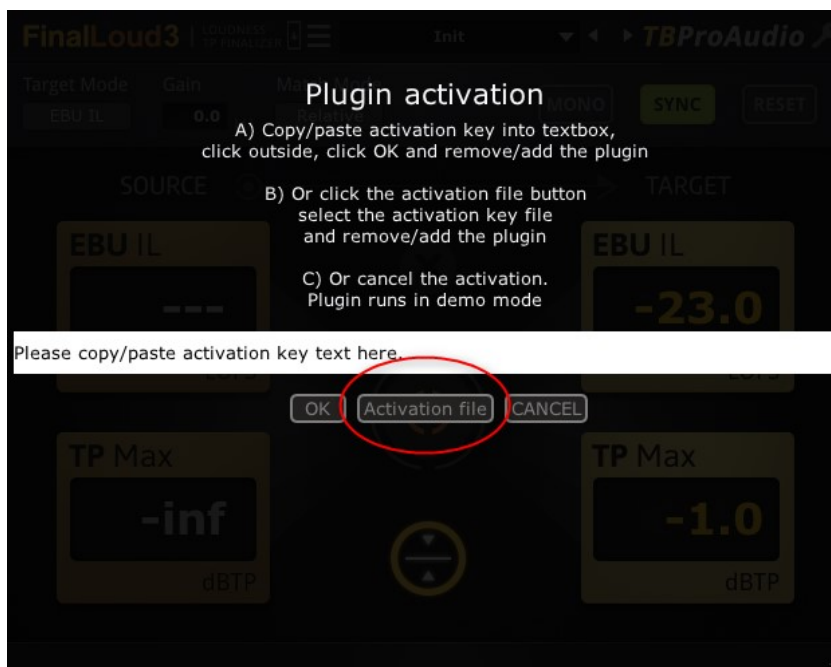

- 2) Open your DAW, create an empty project with an empty track and insert the purchased plugin as effect (example FinalLoud3):

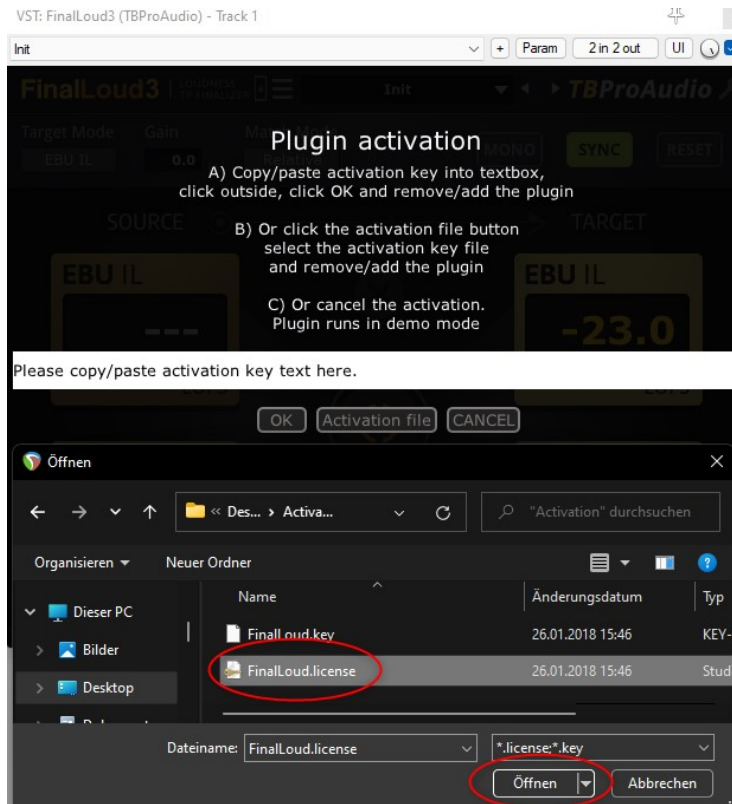

- 3) Open the GUI of the plugin. The activation screen will appear. If not, remove the plugin and add it again or go to the plugin menu->Activate plugin:

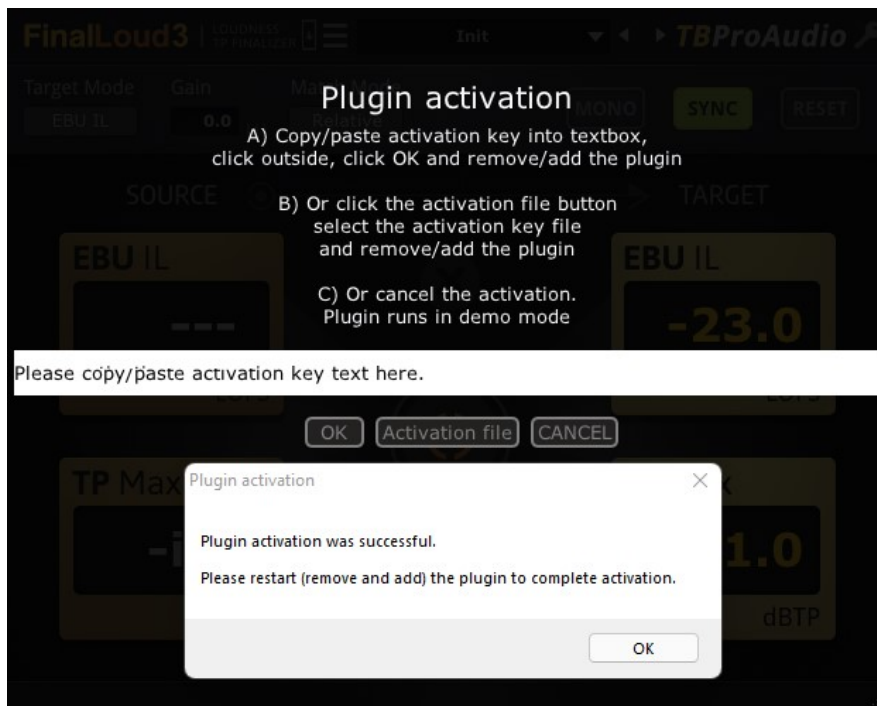

- 4) Click on the button “Activation file”, a file selector box shows up, navigate to the location where you placed the activation key file, select it and press OK.

- 5) The file selector box shows up, navigate to the location where you placed the activation key file, select it and press Open:

- 6) After successful activation following dialog box shows up:

7) Press OK, remove the plugin and add it again. The key icon lights up in golden color:
